THE INSTITUTE OF MANAGEMENT SCIENCES

Officers and Council for 1967

Council Chairman
GEORGE B. DANTZIG
Computer Science Dept.
Stanford University
Stanford, Cal. 94305

President
RONALD A. HOWARD
Inst. Engineering-Econ. Systems
Stanford University
Stanford, Cal. 94305

President-Elect
E. LEONARD ARNOFF
Ernst & Ernst
1300 Union Commerce Bldg.
Cleveland, Ohio 44115

Vice President
ALBERT H. RUBENSTEIN
Dept. of Industr. Engr. & Mngt. Sc.
Northwestern University
Evanston, Illinois 60201

Vice President
JAMES L. MCKENNEY
Grad. School of Business Admin.
Harvard University
Boston, Mass. 02163

Vice President
KURT H. SCHAFFIR
Arthur Andersen & Co.
80 Pine Street
New York, N. Y. 10005

Vice President
DANIEL TEICHROEW
Div. of Organizational Sc.
Case Inst. of Technology
Cleveland, Ohio 44106

Vice Chairman
PAUL A. STRASSMANN
National Dairy Products Corp.
260 Madison Avenue
New York, N. Y. 10016

Secretary-Treasurer
JAMES C. GRACE
Bethlehem Steel Corp.
General Offices
Bethlehem, Pa. 18016

Associate Secretary
PHILIP K. BATES, JR.
Texas Instruments, Inc.
P. O. Box 5012
Dallas, Texas 75222

Council Member
BURTON V. DEAN
Case Inst. of Technology
Cleveland, Ohio 44106

Council Member
JACOB MARSCHAK
Western Management Science Inst.
University of California
Los Angeles, Cal. 90024

Council Member
GEORGE A. STEINER
Grad. School of Business
University of California
Los Angeles, Cal. 90024

Council Member
ROBERT S. WEINBERG
Anheuser-Busch, Inc.
721 Pestalozzi Street
St. Louis, Mo. 63118

Council Member
HANS P. KUNZI
University and Swiss
Federal Inst. of Tech.
Zurich, Switzerland

Council Member
DONALD F. HEANY
General Electric Co.
570 Lexington Ave.
New York, N. Y. 10022

Council Member
EDWARD B. ROBERTS
Sloan School of Management
Mass. Inst. of Technology
Cambridge, Mass. 02139

Executive Director
EDMUND J. BRAY
Box 273
Pleasantville, N. Y. 10570

EDITORIAL COUNCIL

Chairman

PROFESSOR C. WEST CHURCHMAN
School of Business Administration
University of California
Berkeley, California 94720

Editor-in-Chief: Series A—Sciences Section
PROFESSOR R. M. THRALL
Department of Mathematics, W.E.
University of Michigan
Ann Arbor, Michigan 48104

Editor-in-Chief: Series B—Managerial Section
PROFESSOR MARTIN KENNETH STARR
Graduate School of Business
401 Uris Hall
Columbia University
New York, New York 10027

Editor-in-Chief: Series C—Bulletin Section
JOSEPH E. HOAGBIN
Institute of Science & Technology
University of Michigan
P. O. Box 618
Ann Arbor, Michigan 48107

Published monthly by The Institute of Management Sciences at Mt. Royal and Guilford Avenues, Baltimore, Maryland 21202.
Subscriptions, memberships and changes of address should be sent to the Institute at Box 273, Pleasantville, New York 10570, U. S. A., Telephone 914; 769-7961.
Advertising should be sent to E. J. BRAY, P. O. Box 273, Pleasantville, New York 10570, U. S. A.
Subscription price $20.00 per year. Back issues $2.00 per copy when available. See inside back cover.
Membership fee $15.00 per year (U.S. and Canada) which includes a subscription to MANAGEMENT SCIENCE.
Special reduced membership fees available to students, when certified as to status, and residents outside the U.S.A. and Canada.

Library of Congress Catalog Card No. 56-21107. *Printed by the Waverly Press, Inc.*

Second class postage paid at Baltimore, Md. 21202

Articles

Analysis of criteria for investment and financing decisions under certainty: a comment, An, James C. T. Mao: Communications to the Editor, 289.
Analysis of simulation—generated time series, The, George S. Fishman and Philip J. Kiviat, 525.
Application of the Laplace transform to certain economic problems, On the, Robert W. Grubbström, 558.
Are Econometricians, like TIMS, talking to themselves?, George Guy: Communications to the Editor, 152.
Aspects of the effects of the regional distribution of scientific talent on regional economic activity, Some, Ira Horowitz, 217.
Bayesian approach to an individual player's choice of bid in competitive sealed auctions, A, Irving H. Lavalle, 584.
Branch and bound algorithm for the knapsack problem, A, Peter Kolesar, 723.
Car pool systems in railroad transportation: mathematical models, B. Avi-Itzhak, B. A. Benn, and B. A. Powell, 694.
Choosing an optimal technology, On, Martin Heitzman, 413.
Class of optimal stock depletion policies, On a, Jan Mossin, 120.
Comments on George Guy's communication, Donald F. Heany: Communications to the Editor, 153.
Competitive bidding with asymmetrical information, Robert B. Wilson, 816.
Computational experience with variants of the Balas algorithm applied to the selection of R&D projects, Clifford C. Petersen, 736.
Computer simulation model of municipal budgeting, A, John P. Crecine, 786.
Convergence of periodic reinvestments by an amount equal to depreciation, On the, Yuji Giri, 321.
Counterexample in game theory, A, W. F. Lucas: Communications to the Editor, 766.
Deterministic multi-period production scheduling model with backlogging, A, Willard I. Zangwill, 105.
Direct solution of the transportation problem with reduced matrices, The, Paul S. Dwyer, 77.
Discrete optimization via marginal analysis, Bennett Fox, 210.
Efficient use of an imperfect forecast, The, Howard E. Thompson and William Beranek, 233.
Elementary proof of the minimax theorem, An, Guillermo Owen: Communications to the Editor, 765.
Errata, Ronald A. Howard: Communications to the Editor, 154.
Errata, Thomas Marschak: Communications to the Editor, 767.
Engineering approach to the traveling salesman problem, An, S. M. Roberts and Benito Flores, 269.
Expected duration of PERT type networks, On the, Salah E. Elmaghraby, 299.
Experimental methods in quadratic programming, J. W. Moore and A. B. Whinston, 58.
Exponential smoothing and short term sales forecasting, P. J. Harrison, 821.
Extensions of Amaroso-Robinson's formula, Ernst Lykke Jensen, 712.
Factors influencing market penetration, A. W. Allen, 22.
Finite horizon dynamic inventory model with a stockout constraint, A, Paul R. Beesack, 618.
Forecasting non-stationary economic time series, D. Couts, D. Grether, and M. Nerlove, 1.
Generalized cuts in diophantine programming, Fred Glover, 254.
Generation of discount rates and implicit prices through a replacement model, On the, Hermann Enzer, 131.
Heuristics in job shop scheduling, William S. Gere, Jr., 167.
Improved starting algorithm for the Ford-Fulkerson approach to the transportation problem, An, Heiner Mueller-Merbach, 97.
Integer programming formulation to constrained reliability problems, Frank A. Tillman and J. M. Liittschwager, 887.

Inventory depletion management with stochastic field life functions, WILLIAM P. PIERSKALLA, 877.

Labor and machine limited production systems, ROSSER T. NELSON, 648.

Least squares fit of definite quadratic forms by convert programming, H. O. HARTLEY, T. R. HOCKING, AND W. P. COOKE, 913.

Linear programming algorithm for mutual fund portfolio selection, A, WILLIAM F. SHARPE, 499.

Linear programming solutions for separated Markovian decision problems, GUY T. DE GHELLINCK AND GARY EPPEN., 371.

Markovian decision model for a joint replacement and stocking problem, A, C. DERMAN AND T. J. LIEBERMAN, 609.

Mathematical model for a duopolistic market, K. S. KRISHMAN AND SHIV K. GUPTA, 568.

Methods of estimating additive utilities, PETER C. FISHBURN, 435.

Minimum-cost checking using imperfect information, STEPHEN M. POLLOCK, 454.

New model for stochastic linear programming, A, WILLIAM H. EVERS, 680.

Note on level-debt-service municipal bidding, EDWARD P. LOANE: Communications to the Editor, 294.

Note on mathematical analysis of rates of return under certainty, A, CARL NORSTROM: Communications to the Editor, 429.

Nonlinear fractional programming, On, WERNER DINKELBACH, 492.

Nonlinear programming via investment functions, WILLARD I. ZANGWILL, 344.

Optimal level debt schedules for municipal bonds, KALMAN J. COHEN AND FREDRICK S. HAMMER, 161.

Optimal issuing policies in inventory management - 1, WILLIAM PIERSKALLA, 395.

Optimality and computation of (σ, S) policies in the multi-item infinite horizon inventory problem, ELLIS L. JOHNSON, 475.

Optimal strategy for item presentation in a learning process, WILLIAM KARUSH AND R. E. DEAR, 773.

Optimal timing of bond refunding, H. MARTIN WEINGARTNER, 511.

Optimum production planning by the maximum principle, C. L. HWANG, L. T. FAN, AND L. E. ERICKSON, 751.

Parametric production planning, CURTIS H. JONES, 843.

Pareto-optimal dividend policy, A, ROBERT WILSON, 756.

Piecewise concave function, The, WILLARD I. ZANGWILL, 900.

Present value of investments in sinking funds, The, PETER A. DEMETRIOU, 336.

Probability and rates of return: some critical comments, RICHARD H. BERNHARD: Communications to the Editor, 598.

Production smoothing of economic lot sizes with non-decreasing requirements, WILLARD I. ZANGWILL, 191.

Programming variable factors, ROBERT WILSON, 144.

Quadratic assignment problem algorithms and the location of indivisible facilities, FREDRICK S. HILLIER AND MICHAEL M. CONNOR, 42.

Queue $M/G/1$ with feedback to lower priority queues, The, L. E. SCHRAGE, 466.

Randomized replacement rules which maximize the expected cycle length of equipment subject to Markovian deterioration, PETER KOLESAR, 867.

Stochastic inventory model for rented equipment, A, WILLIAM D. WHISLER, 640.

Stochastic programming with aspiration or fractile criteria, ARTHER M. GEOFFRION, 672.

Strictly concave parametric programming, part I: basic theory, ARTHUR M. GEOFFRION, 244.

Strictly concave parametric programming, part II: additional theory and computational considerations, ARTHUR M. GEOFFRION, 359.

Subjective time estimates in critical path planing—a preliminary analysis, WILLIAM R. KING AND TALMADGE A. WILSON, 307.

Technique for initializing exponential smoothing forecasts, A, ROGER C. WADE, 601.

Toward better curricula through computer selected sequencing of subject matter, MARTIN ISRAEL TAFT AND ARNOLD REISMAN, 926.

Transient behavior of a tandem queue, N. U. PRABHU, 631.

Articles

Algorithm and computational procedure for locating economic facilities, An. ROGER C. VERGIN AND JACK D. ROGERS, B-240.

Algorithm for solving job sequencing problems, An. J. T. PRESBY AND M. L. WOLFSON, B-454.

Art of modeling, On the. WILLIAM T. MORRIS, B-707.

Bias in Pert project completion time calculations for a real network, A. R. KLINGEL, JR., B-194.

Buyer behavior, A review of. JAGDISH N. SHETH, B-718.

Capital-budgeting decisions involving combinations of risky investments, JAMES VAN HORNE, B-84.

Cluster analysis in test market selection, PAUL E. GREEN, RONALD E. FRANK AND PATRICK J. ROBINSON, B-387.

Coefficient estimation in quadratic programming models, CHARLES H. KRIEBEL, B-473.

Convergence technique: a method for the planning and programming of research efforts, The. LOUIS M. CARREER AND CARL G. BAKER, B-420.

Critiques. (Beged-Dov) SYLVAIN EHRENFELD, B-832; (Ferber) GEORGE FISK, B-527; (Stogdill) FRED H. GOLDNER, B-677; (Ferber) KENNETH A. LONGMAN, B-529; (Stogdill) ARTHUR L. STINCHCOMBE, B - 678; (Beged - Dov) CHARLES E. SUMMER, B-834.

Decision-making allowing for uncertainty of future investment opportunities,

Seymour Kaplan and Norman N. Barish, B-569.

Decision making, information systems, and the role of the systems analyst, Oleh Kostetsky, C-17.

Decision-theoretic approach on deciding when a sophisticated forecasting technique is needed, A. Lawrence Harris, B-66.

Design methodology, An investigation of. Gerald Nadler, B-642.

Determination of optimal investment policy, The. K. Larry Hastie, B-757.

Dynamic job assignment for railway personnel, Ioánnis A. Pappás, B-809.

Effects of learning on optimal lot size, E. C. Keachie and Robert J. Fontana, B-102.

Evaluation of potential new product alternatives, The. Marshall Freimer and Leonard S. Simon, B-279.

Financial implications of lot-size inventory models, William Beranek, B-401.

Free for all. Robert L. Froemke, B-533; Andrew Grindlay, B-838; David B. Hertz, B-378; Ronald A. Howard, B-681; Martin K. Starr, B-109, B-211.

Heuristic model for scheduling large projects with limited resources, A. Jerome D. Wiest, B-359.

Inflow of private capital and choice of planning strategies, V. R. Panchamukhi, B-255.

Information systems in management science, Harry Stern, B-540, B-693, B-848.

Letters to the editor—free for all. R. M. Adelson, B-535; Clifford G. Bigelow, B-109; John R. Culleton, Jr., B-381; Paul E. Green, Ronald E. Frank and Patrick J. Robinson, B-840; Myron J. Gordon, B-843; Richard M. Greene, Jr., B-212; Lawrence Harris, B-380; George Lieberman, B-380; David B. Montgomery, B-539; Arnold D. Moskowitz, B-213; Milton D. Rubin, B-110, B-843; Bertram Schoner, B-841; Abe Shuchman, B-688; Stanley F. Stasch, B-537; Harry Tobey, B-691; Myron Uretsky, B-212; Herbert J. Weiser, B-685.

Letter to the editor—information systems in management science. Nachman Bench and Sigmund G. Ginsburg, B-693.

Load forecasting, priority sequencing, and simulation in a job shop control system, Michael H. Bulkin, John L. Colley and Harry W. Steinhoff, Jr., B-29.

Long-range planning in open-pit mining, Horst Albach, B-549.

Management education in India, M. V. Pylee, C-209.

Management implementation of scientific research: an attitudinal study, Thomas R. Dyckman, B-612.

Management science and information systems, An overview of. Aharon G. Beged-Dov, B-817 (also see Critiques).

Management science and management—some requirements for further development, A. Charnes and W. W. Cooper, C-3.

Management science in the world of today and tomorrow, George B. Dantzig, C-107.

Management sciences in Nepal, The. Herbert Glazer, C-117.

Marketing science, Kenneth A. Longman, B-852.

Mathematical models in plant maintenance decision making, The use of. Efraim Turban, B-342.

Mathematical models of growth allowances for public utility regulation—a synthesis, F. T. Sparrow, B-327.

Measurement problems in cluster analysis, Donald G. Morrison, B-775.

Metri and the allowance list problem, Gershon Cooper, B-293.

Military essentiality of naval aviation repair parts, Marvin Denicoff, Sheldon E. Haber and Thomas C. Varley, B-439.

Minimum risk manpower scheduling technique, A. Roger F. Jewett, B-578.

Models and modelling for manpower planing, W. R. Dill, D. P. Gaver and W. L. Weber, B-142.

New directions in administration, Donald S. Feigenbaum, C-401.

Optimum seeking with branch and bound, Norman Agin, B-176.

Organizational decision making behavior under varying conditions of uncertainty, David W. Conrath, B-487.

Organizational factors related to the effec-

tiveness of management science groups in industry, Some. ALBERT H. RUBENSTEIN, MICHAEL RADNOR, NORMAN R. BAKER, DAVID R. HEIMAN AND JOHN B. MCCOLLY, B-508.

Planning models, MARTIN K. STARR, B-115.

Power comparability— its contribution to a theory of firm behavior, WILLIAM R. SHERRARD AND RICHARD D. STEADE, B-186.

Principles of practical welfare economics, Some. JULIAN L. SIMON, B-621.

Problem-solving trends in management science, S. BENJAMIN PRASAD, C-10.

Program of research in business planning, A. H. IGOR ANSOFF AND RICHARD C. BRANDENBURG, B-219.

Prospects for the management sciences in advertising, BENJAMIN LIPSTEIN, B-1.

Regression yield curves for U. S. government securities, KALMAN J. COHEN, ROBERT L. KRAMER AND W. HOWARD WAUGH, B-168.

Resistance against analysis and planning in research and development, HELMUT KRAUCH, C-47.

Rise of management science in advertising, The. STANLEY I. COHEN, B-10.

Role of the subconscious in executive decision-making, The. ROBERT C. FERBER, B-519 (also see Critiques).

Rules for investigating cost variances, RICHARD M. DUVALL, B-631.

Sales forecasting with the aid of a human behavior simulator, GEORGE SCHUSSEL, B-593.

Scheduling maintenance and determining crew size for stochastically failing equipment, R. C. VERGIN, B-52.

Semi-probabilistic grading, A note on. IRA HOROWITZ, B-465.

Short and medium range statistical forecasting methods, A comparison of. ROBERT M. KIRBY, B-202.

Simulating communication network experiments, WAYNE S. MARSHALL, B-656.

Simulation of a psychological decision process in personnel selection, ROBERT D. SMITH AND PAUL S. GREENLAW, B-409.

Standards for library expenditures, Developing. POWELL NILAND, B-797.

Subject performance in two six-man communication network experiments, WAYNE S. MARSHALL, B-93.

Sugar cane irrigation: a case study in capital budgeting, ROBERT R. CHAMPION AND R. GEORGE GLASER, B-781.

Technological forecasting in perspective, RAYMOND S. ISENSON, B-70.

Theory of organization, Basic concepts for a. RALPH M. STOGDILL, B-666 (also see Critiques).

Time sharing, management, and management science, G. J. FEENEY, C-112.

Two-stage forecasting model: exponential smoothing and multiple regression, A. DWIGHT B. CRANE AND JAMES R. CROTTY, B-501.
